Dear Tom:

Enclosed please find the NOI application for a Small Mining Operation at the old Essex Mill Site. The permit is submitted in the name of Gene Henrie – dba Quality Crushing currently under contract with Western Hemisphere Equipment to reprocess the tailing to collect the magnetite. When the project is completed, the tailing pond area will be leveled near its original state. A review of the Milford Quadrangle indicates that the entire area that the roads and tailings ponds are located is all previously disturbed lands.

Please review the documents for completeness and advise of any changes or additions you will require.
